Abstract

This citation style covers the citation and bibliography rules of the Kunsthistorisches Institut der Universität Bonn. Various options are available to change and adjust the outcome according to one’s own preferences. The style is compatible with English and German, since all bibstrings used are defined in both languages.

1 Introduction

arthistory is a citation style that complies with the citation and bibliography rules of “Kunsthistorisches Institut der Universität Bonn” (KHI).¹ In particular, it introduces

- new entry types for exhibition catalogs and inventory catalogs,
- special citation short forms for catalogs, encyclopediae as well as primary sources, and
- a tabular bibliography that lists each entry’s citation short form and its full citation, sorted by the citation short forms.

Various options are available to adjust to common practices not covered by the KHI’s rules.

*The development of the code is done at <https://github.com/LukasCBossert/biblatex-arthistory>: Comments and criticisms are welcome.

¹ Website: <https://www.khi.uni-bonn.de>.

2 Installation

arthistory is part of the distributions MiK \TeX ² and T \TeX Live³ – thus, you can easily install it using the respective package manager. If you would like to install arthistory manually, do the following: Download the folder arthistory with all relevant files from the CTAN-server⁴ and copy it to the $\$LOCALTEXMF$ directory of your system.⁵ Refresh your filename database.⁶

3 Usage

arthistory The name of the bib \LaTeX -style is arthistory which has to be activated in the preamble.

```
\usepackage[style=arthistory,%
             <further options>]{biblatex}
\bibliography{<bib-file>}
```

Without any further options the style follows the rules of the Kunsthistorisches Institut der Universität Bonn. No additional settings are needed, but you can change the outcome by using some options which are explained below.⁷

At the end of your document you can write the command `\printbibliography` to print a single bibliography. However, since arthistory supports citation styles for catalogs and primary sources that differ from the standard citations of common scientific contributions, we suggest having them listed in separate bibliographies. Further information can be found below.

4 Overview

There follows a quick overview of possible options of the style arthistory. Furthermore you can – at your own risk – also use the conventional bib \LaTeX -options relating to indent, etc. For that please see the excellent documentation of bib \LaTeX .

4.1 Preamble options

citeauthorformat You can chose how the name of authors or editors are displayed within your text when they are cited with `\citeauthor{<bibtex-key>}`. You can chose between the options `<initials>`, `<full>`, `<family>`, `<firstfull>`; cf.

enddot Every bibliography entry will end with a dot.

⁵ If you don't know what that is, have a look at <http://www.tex.ac.uk/cgi-bin/texfaq2html?label=tds> or <http://mirror.ctan.org/tds/tds.html>.

⁶ Here is some additional information from the UK T \TeX FAQ:

- [Where to install packages](#)
- [Installing files “where \$\LaTeX\$ /T \$\TeX\$ can find them”](#)
- [“Private” installations of files](#)

⁷ For an easy and unproblematic compiling we suggest to use X \LaTeX or Lua \TeX .

`width` `width={value}` defines the bibliography width between label and reference; cf.

4.2 Entry Options

A single bibliography entry can contain a value in its options-field. Depending on the option it changes the behavior of how that entry is cited. Beside their distinct properties all of these options have in common that the separating comma between citation and page record is missing. Actually this concerns citation of ancient texts and corpora where usually the shorthand-field is printed in citations.

4.2.1 shorthand

Entering a shorthand will replace the otherwise automatically generated, document type-appropriate citation short form by the typed-in content.

You need to make use of this option when entering a primary source in your bibliography file (along with the option `source`). The entry should consist of a short version of the primary source's author's name and (possibly an abbreviation of) their contribution's title.

Here is an example of Casanova's Theory of painting:

Example 1: @Book{CasanovaMalerei,...}

```
1 @Book{CasanovaMalerei,
2   author = {Casanova, Giovanni Battista},
3   editor = {Kanz, Roland},
4   title  = {Theorie der Malerei},
5   location = {München},
6   year   = {2008},
7   series = {Phantasos},
8   number = {8},
9   shorthand = {Casanova, Theorie der Malerei},
10  keywords = {source},
11 }
```

As Casanova's text is being published in a book, in the usual case its citation would automatically consist of the author's name and the year of the publication. However, you will notice that the citation footnote is an exact copy of the source option's content.

Example 1

English: Casanova, Theorie der Malerei
Casanova, Giovanni Battista: Theorie der Malerei, ed. by Roland Kanz (Phantasos, 8), München 2008

German: Casanova, Theorie der Malerei
Casanova, Giovanni Battista: Theorie der Malerei, hg. von Roland Kanz (Phantasos, 8), München 2008

4.2.2 shorttitle

Defining a shorttitle can be especially useful when encyclopediae whose title starts with an article are being cited.

4.2.3 sortkey

When entering a (exhibitor) catalogs.

4.2.4 source

This option is reserved for entries that are primary sources (e. g. Alberti, Paleotti, etc). If enabled, the entry can be listed in a separate bibliography for primary sources.

In addition to that, you should define a shorthand that differs from the usual author year citation of regular scientific works in order to comply with the KHI's citation rules, cf. section 4.2.1.

4.3 Cite commands

`\cite` As always citing is done with `\cite`:

```
\cite[⟨prenote⟩][⟨postnote⟩]{⟨bibtex-key⟩}
```

⟨*prenote*⟩ sets a short preliminary note (e. g. “Vgl.”) and ⟨*postnote*⟩ is usually used for page numbers. If only one optional argument is used then it is [⟨*postnote*⟩].

```
\cite[⟨postnote⟩]{⟨bibtex-key⟩}
```

The ⟨*bibtex-key*⟩ corresponds to the key from the bibliography file.

`\cites` If one wants to cite several authors or works a very convenient way is the following using the `\cites`-command:

```
\cites(pre-prenote)(post-postnote)
[⟨prenote⟩][⟨postnote⟩]{⟨bibtex-key⟩}%
[⟨prenote⟩][⟨postnote⟩]{⟨bibtex-key⟩}%
[⟨prenote⟩][⟨postnote⟩]{⟨bibtex-key⟩}...
```

`\footcite` There is also the possibility to put the citation into a footnote at once:

```
\footcite[⟨prenote⟩][⟨postnote⟩]{⟨bibtex-key⟩}
```

`\parencite` Sometimes a citation has to be put in parentheses. Therefore we implemented the command `\parencite`:

```
\parencite[⟨postnote⟩]{⟨bibtex-key⟩}
```

This cite command takes care of the correct corresponding parentheses and brackets. Especially in @Inference citations the parentheses change to (square) brackets.

`\parencites` Of course there is also the possibility to cite several authors/works in parentheses. This is done with `\parencites`:

```
\parencites (pre - prenote) (post - postnote)%
[⟨prenote⟩][⟨postnote⟩]{⟨bibtex-key⟩}%
[⟨prenote⟩][⟨postnote⟩]{⟨bibtex-key⟩}%
[⟨prenote⟩][⟨postnote⟩]{⟨bibtex-key⟩}...
```

`\textcite` Beside the listed `\cite` commands above there is a third way of citing: `\textcite` is useful if the author should be mentioned in the text and the remaining components such as year and page will immediately follow in parentheses.

```
\textcite[⟨postnote⟩]{⟨bibtex-key⟩}
```

`\textcites` And again there is also a `\textcites` in case of several authors:

```
\textcites (pre - prenote) (post - postnote)%
[⟨prenote⟩][⟨postnote⟩]{⟨bibtex-key⟩}%
[⟨prenote⟩][⟨postnote⟩]{⟨bibtex-key⟩}%
[⟨prenote⟩][⟨postnote⟩]{⟨bibtex-key⟩}...
```

`\footcite` Furthermore you can use following `\cite` commands:

```
\footcite[⟨prenote⟩][⟨postnote⟩]{⟨bibtex-key⟩}
```

```
\footcite{Schlegel1992}
```

^a

^a Schlegel 1992.

`\footcitetext`

```
\footcitetext[⟨prenote⟩][⟨postnote⟩]{⟨bibtex-key⟩}
```

```
\footcitetext{Schlegel1992}
```

Ibid.

`\smartcite`

```
\smartcite[⟨prenote⟩][⟨postnote⟩]{⟨bibtex-key⟩}
```

```
\smartcite{Schlegel1992}
```

^a
^a Schlegel 1992.

`\citeauthor` Furthermore and in addition to the ›normal‹ `\cite`-commands one can also cite only the
`\citetitle` author or the work title in the text and in the footnotes.

`\citeauthor[⟨prenote⟩][⟨postnote⟩]{⟨bibtex-key⟩}`

and for the works

`\citetitle[⟨prenote⟩][⟨postnote⟩]{⟨bibtex-key⟩}`

5.5 reference

@Reference This entry type is suited for encyclopaediae.

5.6 review

@Review

This is for reviews of dissertation or habilitation theses, conference proceedings, other scientific publications, exhibitions etc. For a full citation of a review you are asked to name the reviewed work in detail. The following example will show an easy way to combine the review with the reviewed work. First we have the reviewed work:

Example 6: @Book{Heesen2012,...}

```

1   @Book{Heesen2012,
2     author   = {te Heesen, Anke},
3     title    = {Theorien des Museums},
4     publisher = {Junius Verlag},
5     location  = {Hamburg},
6     year     = {2012},
7     titleaddon = {Zur Einführung},
8   }

```

followed by the review itself:

Example 7: @Review{Bonnet2013,...}

```

1   @Review{@Review{Bonnet2013,
2     author   = {Bonnet, Anne-Marie},
3     number   = {10},
4     volume   = {14},
5     journaltitle = {Kunstform},

```

digitales-altertum.de

```

6   related      = {Heesen2012},
7   relatedtype  = {reviewof},
8   year         = {2013},
9   url          = {http://www.arthistoricum.net/kunstform/rezension/
10  ausgabe/2013/10/22240/},
    }

```

You may have noticed that the review (Bonnet2013) is connected to the entry Heesen2012 by the field `related`. In addition we need to qualify the relation between the connected entries: This is done with `relatedtype = {reviewof}`. This so-called bibstring is reserved for reviews and contains the translation of *Review of*, e. g. *Rezension von* in German, which will be printed in squared brackets.
